

TERMS OF REFERENCE – WETLAND CONSERVATION MANAGEMENT PLAN

SPECIALIST ENVIRONMENTAL SERVICES: DEVELOPMENT OF A WETLAND CONSERVATION MANAGEMENT PLAN FOR THE PROPOSED OFFSET SITE – PORTION 57 RICHARDS BAY AS PART OF THE NEW ROCK PHOSPHATE STORAGE APPLICATION FOR FOSKOR.

We hereby thank you for the opportunity to provide you with a proposal for specialist wetland services in developing a wetland conservation management plan as part of the offset planning on Portion 57, Richards Bay, linked with the environmental assessment process for the for the proposed Foskor Rock Phosphate Storage Facility.

OBJECTIVES

The envisaged scope of study for this assessment will include:

- Develop a practical Conservation Management Plan for the successful rehabilitation and ongoing protection and management of the wetlands on Portion 57 as part of the proposed offset mitigation for wetland loss on Portions 55 and 56;
- Develop and alien invasive plant management program; and
- Develop a monitoring program to ensure the quality of the system is maintained

ASSUMPTIONS

- Time has been allocated for each activity. Should this allocation be exceeded through scope changes beyond our control, the Client will be charged at an hourly rate, once the scope change has been agreed.
- All assessments will be made based on a specific layout referenced in the report All reports become void should the layout be amended without written acknowledgment from SiVEST;
- Additional planning information required for the study will be made available to SiVEST.
- Please note that this quotation does not include Wetland Health assessments or riparian and in-stream aquatic habitat assessments.
